effect

We are interested in how effective you find the argument made in these segments. In so doing, please view the argument in an evenhanded way, putting any concerns about the source aside. We will then (next) ask that you justify the reasons for your judgment – that is, why you found the argument less or more effective. For now, please check one point on the scale below.

support

Putting the source aside, would you say this argument, overall, comes across as being more opposed, neither opposed nor supportive, or more supportive of efforts to increase the domestic production of oil and natural gas?
